Profile

“At Ranasons,
our philosophy
remains clear, if
its Blow Moulding
it can be done on
Ranasons Blow
Moulding
Machinery.

We are and will
always be
proactive and
your imperative
for anything and
everything in the
Plastic Blow
Moulding
Industry.”

Our late founder, Shri Santosh Kumar Rana has a vision of creating innovative machinery to produce high weight, colourful and adaptive articles for households industries, packaging containers and various other applications. He translated his vision and passion into designing various types of Blow Moulding Machines from 100ml to 2000L & moulds in various shapes and sizes. Ranasons takes pride to be one of his indulgent children and it is with his constant and untiring efforts of innovations and development in Blow Moulding processes that Ranasons has today carved its niche as numero one in Plastic Packaging Industry, in domestic as well as International Markets.

Following in the footsteps, his eldest son Mr. Sunil Santosh Rana has taken the touch further and has applied and blended his vast expertise and experience acquired through study tours under taken from time to time of Industrial Countries in Europe and far east. Mr. Sunil Rana is very well recognised in the industry for his foresightedness and ability of continuous development in the sector. Under his leadership, the company has acquired valuable technological assets. He has been the creator of various first in India Plastic Blow Moulding Machines which widely incorporates Tiebarless Technology, Co-Extrusion Technology, Injection Blow Moulding, 3D Blow Moulding, LiquiBlow, Blow Form Seal Technology and All Electric Blow Moulding Machine. He is also regarded as the pioneer of PET-Stretch Blow Moulding Machine in the country.

Mr. Pawan Sunil Rana has now crossed the threshold as a team member of third generation with his unique ambitions of diversifying into new ideas and images in the Blow Moulding as well as introducing newer processes in the contemporary time. Academically, he is well nurtured in Computer Science and MBA Majors in Entrepreneurship & Marketing.

Our Mission

To provide customers with product that are robust, user friendly, optimum quality, value added products, services and solutions, which yielding the lowest life cycle cost, with integrity and character.

Our Vision

To be the imperative partner and Blow Moulding end to end solution provider both domestically and globally.

Our Core Values

Quality since inception our foremost concern has been build quality and robust structural construction, when you first run a Ranasons Machine its time to find out the difference yourself. Reliability with close aspects on quality is what we offer you with every machinery. Years of hassle free operations, performance comes standard with all Ranasons Blow Moulding Machines. With stringent approach to quality and continuous in-house developments our machines have set standards in various processes in amongst many industry segments already.

Excellence with over 4 decades in manufacturing, ease of operation, unconditional service support, production and lifecycle, excellence is at heart of Ranasons Blow Moulding Machines and
Your Imperative Partner
